# Instruction Manual

## *Humidifier*

### KSTHW50LAG

## For Household Use Only

# IMPORTANT SAFEGUARDS

### READ AND SAVE THESE INSTRUCTIONS.

When using electric appliances, basic safety precautions should always be followed, including the following:

1. Read all instructions before using this humidifier. Save these instructions for reference.
2. Always place the humidifier on a firm, flat, level, water-resistant surface.
3. To reduce the risk of electrical shock, never plug humidifier into an outlet while your hands are wet.
4. Never drop or insert any objects into any openings.
5. Never place the humidifier in a location where it is accessible to children.
6. Do not place the humidifier on or near heat sources such as stoves, radiators, heaters, or in direct sunlight.

7. Never connect the humidifier to any power source other than 120 V AC.
8. Always unplug the humidifier before refilling, cleaning, servicing, or moving.
9. Before each use, check the cord and plug for damage. Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or is dropped or damaged in any manner. Call our toll-free customer service number for information on examination, repair or electrical or mechanical adjustment.
10. Always unplug and empty humidifier and tank when it is not in use.
11. Never tilt or attempt to move the humidifier or supporting surface while it is operating or full of water. Turn off and unplug the humidifier before removing the water tank and moving the unit.
12. This humidifier requires regular cleaning and maintenance. Refer to the instructions in the "How to Clean" section. Never clean the humidifier in a manner other than described in this manual.
13. Do not immerse fan enclosure in water or other liquids, or allow it to get wet.
14. Never use detergents, household cleaners, or other solvents to clean the humidifier, other than those specified in the Cleaning Instructions provided in this manual.
15. Do not direct output from unit at walls, furniture, or the like.
16. To disconnect cord, turn the control to OFF, then remove plug from wall outlet.
17. Do not use appliance for other than its intended purpose.
18. Never stand or sit on any part of the humidifier, and never place objects on the humidifier.

This appliance is equipped with a polarized plug. This type of plug has one blade wider than the other. The plug will fit into an electrical outlet only one way. This is a safety feature intended to help reduce the risk of electrical shock.

If you are unable to insert the plug into the outlet, try reversing the plug. If the plug should still fail to fit, contact a qualified electrician to replace the obsolete outlet. Do not attempt to defeat the safety purpose of the polarized plug by modifying the plug in any way.

If a longer cord is necessary an approved extension cord may be used. The electrical rating of the extension cord must be equal to or greater than the rating of the humidifier. Care must be taken to arrange the extension cord so that it will not drape over the countertop or tabletop where it can be pulled on by children or accidentally tripped over.

## SAVE THESE INSTRUCTIONS

# Know Your Humidifier

## Parts and Features

### ※ Safety Tip-Over Switch

The humidifier is secured with a device of tip-over switch. When it topples, the heating element and the ventilator are switched off automatically. When the heater is standing upright again, it is switched back on.

## Before First Use

Be sure to remove all packing materials.

Choose a flat, level, water-resistant location for the humidifier that will allow for good air circulation and that is not accessible to children.

Do not place the humidifier where it or its cord presents a tripping or stumbling hazard, or where the air vents are blocked.

## How to Assemble and Use

### IMPORTANT:

Make sure that the water tray and filter are properly installed before filling the tank and operating the humidifier.

**DO NOT USE THE HUMIDIFIER WITHOUT THE FILTER IN PLACE!**

## Selecting the Proper Location

To prevent the risk of injury or damage to the humidifier and furnishings and provide the best possible performance of your humidifier, follow the placement guidelines below:

### DO:

- Place the humidifier on a flat, stable, waterproof surface.
- Place the humidifier along an inside wall near an electrical outlet where it is out of the way and it and its cord do not present a tripping hazard.
- Select a location with adequate air circulation.
- Leave at least six inches (15 cm) between the humidifier and any walls or furnishings. Failure to do so could cause poor air circulation and mildew or moisture damage to walls or furniture.
- Unplug the humidifier and empty the water tank and tray if the humidifier is to be moved, or will not be used for several days.

### DO NOT:

- Do not block the air intake and exhaust grilles. This will cause poor performance and may cause moisture damage and mildew build-up.
- Do not use in a small, enclosed space or in an area with a humidity level above 50%. Excessive humidity could result.
- Do not place on or near heat sources such as stoves, radiators, or heaters, or in direct sunlight.
- Never place the humidifier in a closed room. A closed room may result in excessive humidity.
- To reduce electrical noise and interference, do not place on or near, or plug into the same outlet as, TVs, baby monitors, or cordless phones.

- Avoid to place couch and carpet. It happens high hot and to burn carpet easily when hearting hard in bottom.

#### **WARNING:**

Do not move when using or finishing. Hot Water leaks out cause scald.

## **Operation**

### **Filling the Water Tank**

Take the water tank from main body and open the screw plug counterclockwise. Fill the water tank with clear, clean water and replace the screw plug firmly. Turn the water tank back over and place it in the main body. Make sure that is securely positioned.

Following order to clear when supplying every time:

- Open water tank cap and fill (about 1/3) tap water.
- Close water cap and shake clean inside, and dump water.

Add tap water.

#### **WARNING:**

- Output Nozzle does not plug tap directly.
- Do not add hot eater up 40°C.

**Do not set water trough random. The air of water trough expands because hot power of electric stove and shine shoot directly will cause to go to temper, and water trough changes shape.**

### **Setting the Controls**

1. Plug the appliance into power outlet. Turn on On/Off switch to run the appliance. The power on led will illuminate.
2. Hi: mist output is about 400cc/ hr, Lo: mist output is about 200cc/ hr
3. Refill indicator light: will illuminate when tank is empty or removed.
4. Atomizer stopping will do automatically, and output as no mist.
5. Want to use continually with adding water.
6. Cut power switch without using

**CAUTION:** Once the tank is empty, the appliance will switch itself off automatically via the water level sensor. Always switch the appliance off before removing the tank.

**WARNING:** DO NOT TOUCH or face near steam nozzle, because it causes a scald.

## **How to Clean**

**IMPORTANT:** Clean your humidifier regularly (every 2 weeks or more as needed) to help eliminate odors.

**CAUTION:** Disconnect the power cord before cleaning the unit.

1. Turn OFF and unplug the humidifier.
2. Remove the water tank from the base.
3. Pour all water from the tank. DO NOT USE SOAP OR DETERGENTS AND NEVER USE ABRASIVE CLEANERS.
4. Rinse the Water Tank thoroughly with clean water or with a mild bleach and water solution.
5. Take brush stored in base and clean off mineral deposits and debris from nebulizer and water sensor.
6. Wipe all surfaces of the base unit with a soft DRY or slightly dampened cloth.  
DO NOT IMMERSE THE BASE UNIT IN WATER, AN ELECTRIC SHOCK MAY RESULT OR THE HUMIDIFIER MAY BE DAMAGED.
7. Prior to storage, make sure all components are completely dry.
